

New Source Review newspaper advertisements for construction permit applications, January 21, 2005. The following public notices have been published in the newspapers listed below each advertisement. These newspaper advertisements for construction permit applications were published on one of the following dates: January 19, January 20, or January 21, 2005. Public notices are generally published every two weeks. The previous publication of public notices was January 11- 13, 2005.

PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction of air contaminant sources as noted below. The proposed construction is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9th Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is Mueller Co. – Cleveland with a mailing address of 1401 Mueller Avenue, Chattanooga, TN 37406. They seek to obtain an air contaminant permit (Division identification number: 06-0220-09/57761) for modification of a Rubber Encapsulation Process located at 155 Enterprise Drive Southwest, Cleveland, TN 37111. This existing operation consists of equipment used to coat metal components with a protective rubber coating. The proposed modification is the addition of three new rubber encapsulating presses to the existing rubber encapsulation source. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. R. Simmons is the assigned Division person.

For the Bradley County “Cleveland Daily Banner”--published once on or before Friday, January 21, 2005.

The applicant is Summers-Taylor, Inc. with a mailing address of P.O. Box 1628, Elizabethton, TN 37644-1628. They seek to obtain an air contaminant permit (Division identification number: 10-0011-02/57867) for modification of a Portable Asphalt Crusher located at Rinker Materials Quarry, Watauga, TN 37694. This existing operation consists of one (1) 200 ton per hour asphalt crusher and one (1) number 2 oil-fired generator used to provide electric power to the crusher. The requested modification is to add the existing generator to the current permit. Because of the amount and type of emissions, the use of air pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. Steven Simpson is the assigned Division person.

For the Carter County “Elizabethton Star”--published once on or before Friday, January 21, 2005.

The applicant is Nissan North America, Inc.- Decherd Powertrain Assembly Plant with a mailing address of P. O. Box 272, Decherd, TN 37324. They seek to obtain an air contaminant permit (Division identification number: 26-0091-04/57894) for modification of Miscellaneous Solvent Usage at their facility located on Warren Chapel Road, Decherd, TN 37324. The proposed modification is to increase their use of miscellaneous solvents used for clean-up, maintenance and repair activities by 5 gallons/day. Because of the type and amount of emissions, the use of pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants emitted from this source would increase. Ms. Angela Pitcock is the assigned Division person.

For the Franklin County "Herald-Chronicle"--published once on or before Friday, January 21, 2005.

The applicant is Stewart Lumber Company, Inc. with a mailing address of P.O. Box 643, Morristown, TN 37815. They seek to obtain air contaminant permits for operation/modification of air contaminant sources located at 414 New Line Road, Morristown, TN 37815, as follows:

(1) Sawing and Planing Operations (Division identification numbers: 32-0195-01/57815 and 32-0195-02/57816). These existing operations consist of equipment used for sawing, planing and trimming of lumber. Cyclones are used for pollution control of particulate emissions. The proposed modification is to increase operating hours and material input. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. R. Chuang is the assigned Division person.

(2) Boiler Operation (Division identification number: 32-0195-03/57817). This existing operation consists of a 300 horsepower boiler used to dry lumber. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. R. Chuang is the assigned Division person.

For the Hamblen County "Citizen Tribune" -- published once on or before Friday, January 21, 2005.

The applicant is Rogers Group, Inc. with a mailing address of P.O. Box 25250, Nashville, TN 37202-5250. They seek to obtain an air contaminant permit (Division identification number: 50-0035-04/57889) for construction of an Asphalt Batch Plant at 2690 Waynesboro Highway, Lawrenceburg, TN 38464. This proposed operation would consist of a gravel stockpile, a continuous type mixer, an asphalt regrind circuit, and associated equipment used to produce hot-mix asphalt. Number 2 and number 4 fuel oils would be used for fuel. A baghouse and wet suppression would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. J. Fuss is the assigned Division person.

For the Lawrence County "Democrat-Union"--published once on or before Friday, January 21, 2005.

FIRST APPLICANT

The first applicant is Custom Steel Fabricators, Inc. with a mailing address of P.O. Box 343, Columbia, TN 38402. They seek to obtain an air contaminant permit (Division identification number: 60-0171-01/57751) for modification of a Sandblasting Operation located at 308 W. 12th Street, Columbia, TN 38402. The requested modification is to increase annual hours of operation from 535 hours to 650 hours. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. Jim A. Attar is the assigned Division person.

SECOND APPLICANT

The second applicant is Cytec Industries, Inc. with a mailing address of P.O. Box 152, Mt. Pleasant, TN 38474. They seek to obtain an air contaminant permit (Division identification number: 60-0041-29/57895) for modification of a Chemical Manufacturing Operation located at 7910 Mt. Joy Road, Mt. Pleasant, TN 38474. This existing operation consists of chemical storage tanks, reactors, and associated equipment used to produce a chemical product. Condensers are used for pollution control. The requested modification is to increase the size and throughput rates for several of the reactors and storage tanks. A scrubber would be installed for additional pollution control and existing pollution control equipment would be modified to improve efficiency. There would be physical construction. Regulated air contaminants emitted by this source would decrease. Mr. M. Smith is the assigned Division person.

For the Maury County "Daily Herald"--published once on or before Friday, January 21, 2005.

The applicant is Bridgestone Metalpha USA, Inc. with a mailing address of 570 International Boulevard, Clarksville, TN 37040. They seek to obtain air contaminant permits for construction of air contaminant sources at the same address, as follows:

(1) Steel Descaling, Coating, and Drawing Operations (Division identification number: 63-0142-01/57858). This proposed operation would consist of equipment used for descaling, coating, and drawing of steel. A baghouse would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. R. Simmons is the assigned Division person.

(2) Plating Operation (Division identification number: 63-0142-02/57859). This proposed operation would consist of a gas-fired plating furnace, patenting furnace, and plating baths. A wet scrubber would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. R. Simmons is the assigned Division person.

For the "Montgomery County "Leaf-Chronicle"--published once on or before Friday, January 21, 2005.

FIRST APPLICANT

The first applicant is EnViroPac/dba Fibercel with a mailing address of 440 Universal Drive, Cookeville, TN 38560. They seek to obtain an air contaminant permit (Division identification number: 71-0222-01/57735) for construction of an Oven Operation at the same address. This proposed operation would consist of three (3) multi-zone, direct-fired, convection type ovens. Because of the amount and type of emission, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. R. Simmons is the assigned Division person.

SECOND APPLICANT

The second applicant is Monterey Limestone with a mailing address of P.O. Box 331, Livingston, TN 38570. They seek to obtain an air contaminant permit (Division identification number: 71-0163-01/57892) to modify a Rock Crushing and Sizing Operation located on Highway 84 North, Monterey, TN 38574. This existing operation consists of crushers, screens, conveyors, limestone aggregate stockpiles, and associated equipment used to produce crushed limestone rock. The requested modification is the replacement of a Jeffery hammermill with a Metso impactor of identical capacity. Wet suppression would be used to control particulate (TSP) emissions. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. W. Medley is the assigned Division person.

For the Putnam County "Cookeville Herald-Citizen"-- published once on or before Friday, January 21, 2005.

The applicant is Baggett Grain, Inc. with a mailing address of 4781 Hwy 41 North, Springfield, TN 37172. They seek to obtain air contaminant permits (Division identification numbers: 74-0123-02/57737, 74-0123-03/57738, 74-0123-04/57739, and 74-0123-05/57740) for Grain Drying and Handling Operations located at 3900 Memorial Blvd., Springfield, TN 37172. These existing operations consist of two (2) grain dryers (D1 and D2), and grain handling operations(R1 and R2). A cyclone is used for pollution control. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. R. Simmons is the assigned Division person.

For the "Robertson County Times"-- published once on or before Friday, January 21, 2005.

The applicant is Blalock Lumber Company with a mailing address of P.O. Box 4750, Sevierville, TN 37864. They seek to obtain air contaminant permits for modification of Concrete Batch Plants at the following locations:

- (1) 1225 Parkway, Sevierville, TN 37862 (Division identification number: 78-0061-01/57906).
- (2) Middle Creek Road, Pigeon Forge, TN 37863 (78-109-01/57907).
- (3) Hwy. 338, Boyd's Creek Road, Sevierville, TN 37862 (78-0110-01/57908).

These existing operations consist of mixing, conveying, and storage equipment used to produce concrete. Baghouses and wet suppression are used for control of particulate emissions. The requested modification is to increase the allowable production limits at each site. There would be no physical construction. Regulated air contaminants emitted by each source would increase. Mr. T. Blake is the assigned Division person.

For the Sevier County "Mountain Press"--published once on or before Friday, January 21, 2005.
